Subject: Microsoft Settlement

I find any settlement in the Microsoft Anti-trust case insulting. So I must voice my position about the current settlement and let it be known I am strongly against it. Microsoft was found Guilty of being a Monopoly and continue to operate as one to this day. Microsoft's OEM licensing that restricts PC manufacturerers from installing other OS'es alongside any Microsoft OS should be enough on it's own to land them in serious legal trouble, but somehow it doesn't. Microsoft is in the buisness of killing companies first, inovating and delivering product second. This behavior should not be allowed. I don't want to wake up one morning to be told I can't brush my teeth because my license on my Microsoft toothbrush has expired, and I can't by a non-Microsoft toothbrush because they aren't built with trusted hardware.
